## READY TO TEST

REVIEW AND PRACTICE TEST

DO NOT TURN THE PAGE UNTIL INSTRUCTED TO DO SO.

Turn over your page to begin the test. You will have 1 hour and 15 minutes to complete the test. You may use a calculator, but you must show all work for each problem. You may not use a ruler or any other measuring device.

DO NOT TURN THE PAGE UNTIL INSTRUCTED TO DO SO.

### Test begins on the next page.

# Reading Test

## 65 MINUTES, 52 QUESTIONS

Turn to Section 1 of your answer sheet to answer the questions in this section.

### DIRECTIONS

Each passage or pair of passages below is followed by a number of questions. After reading each passage or pair, choose the best answer to each question based on what is stated or implied in the passage or passages and in any accompanying graphics (such as a table or graph).

**Questions 1-10 are based on the following passage.**

This passage is adapted from Daniyal Mueenuddin, "Nawabdin Electrician." ©2009 by Daniyal Mueenuddin.

Another man might have thrown up his hands—but not Nawabdin. His twelve daughters acted as a spur to his genius, and he looked with satisfaction in the mirror each morning at the face of a warrior going out to do battle. Nawab of course knew that he must proliferate his sources of revenue—the salary he received from K. K. Harouni for tending the tube wells would not even begin to suffice. He set up a little one-room flour mill, run off a condemned electric motor—condemned by him. He tried his hand at fish-farming in a little pond at the edge of his master's fields. He bought broken radios, fixed them, and resold them. He did not demur even when asked to fix watches, though that enterprise did spectacularly badly, and in fact earned him more kicks than kudos, for no watch he took apart ever kept time again.

K. K. Harouni rarely went to his farms, but lived mostly in Lahore. Whenever the old man visited, Nawab would place himself night and day at the door leading from the servants' sitting area into the walled grove of ancient banyan trees where the old farmhouse stood. Grizzled, his peculiar aviator

glasses bent and smudged, Nawab tended the household machinery, the air conditioners, water heaters, refrigerators, and water pumps, like an engineer tending the boilers on a foundering steamer in an Atlantic gale. By his superhuman efforts he almost managed to maintain K. K. Harouni in the same mechanical cocoon, cooled and bathed and lighted and fed, that the landowner enjoyed in Lahore.

Harouni of course became familiar with this ubiquitous man, who not only accompanied him on his tours of inspection, but morning and night could be found standing on the master bed rewiring the light fixture or in the bathroom poking at the water heater. Finally, one evening at teatime, gauging the psychological moment, Nawab asked if he might say a word. The landowner, who was cheerfully filing his nails in front of a crackling rosewood fire, told him to go ahead.

"Sir, as you know, your lands stretch from here to the Indus, and on these lands are fully seventeen tube wells, and to tend these seventeen tube wells there is but one man, me, your servant. In your service I have earned these gray hairs"—here he bowed his head to show the gray—"and now I cannot fulfill my duties as I should. Enough, sir, enough. I beg you, forgive me my weakness. Better a darkened house and proud hunger within than disgrace in the light of day. Release me, I ask you, I beg you."

The old man, well accustomed to these sorts of speeches, though not usually this florid, filed away at his nails and waited for the breeze to stop.

"What's the matter, Nawabdin?"

"Matter, sir? O what could be the matter in your service. I've eaten your salt for all my years. But sir, on the bicycle now, with my old legs, and with the many injuries I've received when heavy machinery fell on me—I cannot any longer bicycle about like a bridegroom from farm to farm, as I could when I first had the good fortune to enter your employment. I beg you, sir, let me go."

"And what's the solution?" asked Harouni, seeing that they had come to the crux. He didn't particularly care one way or the other, except that it touched on his comfort—a matter of great interest to him.

"Well, sir, if I had a motorcycle, then I could somehow limp along, at least until I train up some younger man."

The crops that year had been good, Harouni felt expansive in front of the fire, and so, much to the disgust of the farm managers, Nawab received a brand-new motorcycle, a Honda 70. He even managed to extract an allowance for gasoline.

The motorcycle increased his status, gave him weight, so that people began calling him "Uncle," and asking his opinion on world affairs, about which he knew absolutely nothing. He could now range further, doing a much wider business. Best of all, now he could spend every night with his wife, who had begged to live not on the farm but near her family in Firoza, where also they could educate at least the two eldest daughters. A long straight road ran from the canal headworks near Firoza all the way to the Indus, through the heart of the K. K. Harouni lands. Nawab would fly down this road on his new machine, with bags and cloths hanging from every knob and brace, so that the bike, when he hit a bump, seemed to be flapping numerous small vestigial wings; and with his grinning face, as he rolled up to whichever tube well needed servicing, with his ears almost blown off, he shone with the speed of his arrival.

1

The main purpose of the first paragraph is to

- A) characterize Nawab as a loving father.
- B) outline the schedule of a typical day in Nawab's life.
- C) describe Nawab's various moneymaking ventures.
- D) contrast Nawab's and Harouni's lifestyles.

2

As used in line 16, "kicks" most nearly means

- A) thrills.
- B) complaints.
- C) jolts.
- D) interests.

3

The author uses the image of an engineer at sea (lines 23-28) most likely to

- A) suggest that Nawab often dreams of having a more exciting profession.
- B) highlight the fact that Nawab's primary job is to tend to Harouni's tube wells.
- C) reinforce the idea that Nawab has had many different occupations in his life.
- D) emphasize how demanding Nawab's work for Harouni is.

4

Which choice best supports the claim that Nawab performs his duties for Harouni well?

- A) Lines 28-32 ("By his . . . Lahore")
- B) Lines 40-42 ("The landowner . . . ahead")
- C) Lines 46-49 ("In your . . . should")
- D) Line 58 ("I've . . . years")

5

In the context of the conversation between Nawab and Harouni, Nawab's comments in lines 43-52 ("Sir . . . beg you") mainly serve to

- A) flatter Harouni by mentioning how vast his lands are.
- B) boast to Harouni about how competent and reliable Nawab is.
- C) emphasize Nawab's diligence and loyalty to Harouni.
- D) notify Harouni that Nawab intends to quit his job tending the tube wells.

6

Nawab uses the word "bridegroom" (line 62) mainly to emphasize that he's no longer

- A) in love.
- B) naive.
- C) busy.
- D) young.

7

It can reasonably be inferred from the passage that Harouni provides Nawab with a motorcycle mainly because

- A) Harouni appreciates that Nawab has to work hard to support his family.
- B) Harouni sees benefit to himself from giving Nawab a motorcycle.
- C) Nawab's speech is the most eloquent that Harouni has ever heard.
- D) Nawab threatens to quit if Harouni doesn't agree to give him a motorcycle.

8

Which choice provides the best evidence for the answer to the previous question?

- A) Lines 65–66 (“And . . . crux”)
- B) Lines 66–68 (“He didn’t . . . him”)
- C) Lines 75–76 (“He even . . . gasoline”)
- D) Lines 80–81 (“He could . . . business”)

9

The passage states that the farm managers react to Nawab receiving a motorcycle with

- A) disgust.
- B) happiness.
- C) envy.
- D) indifference.

10

According to the passage, what does Nawab consider to be the best result of getting the motorcycle?

- A) People start calling him “Uncle.”
- B) He’s able to expand his business.
- C) He’s able to educate his daughters.
- D) He can spend more time with his wife.

**Questions 11-21 are based on the following passage and supplementary material.**

This passage is adapted from Stephen Coleman, Scott Anthony, and David E. Morrison, "Public Trust in the News." ©2009 by Stephen Coleman.

The news is a form of public knowledge. Unlike personal or private knowledge (such as the health of one's friends and family; the conduct of a line private hobby; a secret liaison), public knowledge increases in value as it is shared by more people. The date of an election and the claims of rival candidates; the causes and consequences of an environmental disaster; a debate about how to frame a particular law; the latest reports from a war zone—these are all examples of public knowledge that people are generally expected to know in order to be considered informed citizens. Thus, in contrast to personal or private knowledge, which is generally left to individuals to pursue or ignore, public knowledge is promoted even to those who might not think it matters to them. In short, the circulation of public knowledge, including the news, is generally regarded as a public good which cannot be solely demand-driven.

The production, circulation, and reception of public knowledge is a complex process. It is generally accepted that public knowledge should be authoritative, but there is not always common agreement about what the public needs to know, who is best placed to relate and explain it, and how authoritative reputations should be determined and evaluated. Historically, newspapers such as *The Times* and broadcasters such as the BBC were widely regarded as the trusted shapers of authoritative agendas and conventional wisdom. They embodied the *Oxford English Dictionary's* definition of authority as the "power over, or title to influence, the opinions of others." As part of the general process of the transformation of authority whereby there has been a reluctance to uncritically accept traditional sources of public knowledge, the demand has been for all authority to make explicit the frames of value which determine their decisions. Centres of news production, as our focus groups show, have not been exempt from this process. Not surprisingly perhaps some news journalists feel uneasy about this renegotiation of their authority:

Editors are increasingly casting a glance at the "most read" lists on their own and other websites to work out which stories matter to readers and viewers. And now the audience—which used to know its place—is being asked to act as a kind of journalistic ombudsman, ruling on our credibility (broadcast journalist, 2008).

The result of democratising access to TV news could be political disengagement by the majority and a dumbing down through a popularity contest of stories (online news editor, 2007).

Despite the rhetorical bluster of these statements, they amount to more than straightforward professional defensiveness. In their reference to an audience "which used to know its place" and conflation between democratisation and "dumbing down," they are seeking to argue for a particular mode of public knowledge: one which is shaped by experts, immune from populist pressures; and disseminated to attentive, but mainly passive recipients. It is a view of citizenship that closes down opportunities for popular involvement in the making of public knowledge by reinforcing the professional claims of experts. The journalists quoted above are right to feel uneasy, for there is, at almost every institutional level in contemporary society, scepticism towards the epistemological authority of expert elites. There is a growing feeling, as expressed by several of our focus group participants, that the news media should be "informative rather than authoritative"; the job of journalists should be to "give the news as raw as it is, without putting their slant on it"; and people should be given "sufficient information" from which "we would be able to form opinions of our own."

At stake here are two distinct conceptions of authority. The journalists we have quoted are resistant to the democratisation of news: the supremacy of the clickstream (according to which editors raise or lower the profile of stories according to the number of readers clicking on them online); the parity of popular culture with "serious" news; the demands of some audience members for raw news rather than constructed narratives.

VIEWS OF THE NEWS MEDIA, 1985-2011 ©2011 BY PEW RESEARCH CENTER  
Adapted from "Pew Research Center for the People & the Press Report on News Organizations."

News Organizations...							
	1985	1992	2003	2007	2011		
• Get the facts straight	55	49	36	39	25		
• Often have inaccurate stories	34	44	56	53	66		
• Don't know	11	7	8	8	9		
• Are pretty independent	37	35	23	23	15		
• Are often influenced by powerful people and organizations	53	58	70	69	80

Percentage of Respondents Seeing News Stories As Inaccurate or Favoring One Side

- The authors indicate that the public is coming to believe that journalists' reports should avoid details that the subjects of news reports wish to keep private.
- D) details that the subjects of news reports wish to keep private.  
 matter.

- A) personal judgments about the events reported.  
 B) more information than is absolutely necessary.  
 C) quotations from authorities on the subject.

The authors indicate that the public is coming to believe that journalists' reports should avoid details that the subjects of news reports wish to keep private.

- The authors most likely include the extended quotations in lines 43-53 to
- A) present contrarian examples.  
 B) cite representative opinions.  
 C) criticize typical viewpoints.  
 D) suggest viable alternatives.

The authors most likely include the extended quotations in lines 43-53 to

16

15

14

As used in line 2A, "common" most nearly means

- A) numerous.  
 B) familiar.  
 C) widespread.  
 D) ordinary.

- D) Lines 43-46 ("Editors . . . viewers")  
 C) Lines 33-38 ("As part . . . decisions")  
 B) Lines 20-21 ("The production . . . process")  
 A) Lines 2-5 ("Unlike . . . people")

Which choice provides the best evidence for the answer to the previous question?

13

- A) They should be transparent about their beliefs and assumptions.  
 B) They should be committed to bringing about positive social change.  
 C) They should be respectful of the difference between public and private knowledge.  
 D) They should be transparent about their beliefs and assumptions.

- A) According to the passage, which expectation do traditional authorities now face?  
 B) show how journalists' frames of value influence media as a source of public knowledge.  
 C) discuss changes in the perception of the news reception of news stories.  
 D) challenge the conventional view that news is a form of public knowledge.

The main purpose of the passage is to

12

- A) They should be influenced by commercial considerations.  
 B) They should be committed to bringing about positive social change.  
 C) They should be respectful of the difference between public and private knowledge.  
 D) They should be transparent about their beliefs and assumptions.

- A) The authors indicate that the public is coming to believe that journalists' reports should avoid details that the subjects of news reports wish to keep private.
- B) They should be transparent about their beliefs and assumptions.
- C) They should be respectful of the difference between public and private knowledge.
- D) They should be transparent about their beliefs and assumptions.

11

The main purpose of the passage is to

- A) analyze the technological developments that have affected the production, circulation, and reception of news stories.  
 B) discuss changes in the perception of the news media as a source of public knowledge.

- C) show how journalists' frames of value influence media as a source of public knowledge.  
 D) challenge the conventional view that news is a form of public knowledge.

The researchers also wanted to know whether extra bees would impose a double cost by both damaging flowers and deterring bees, which might not bother to visit (and pollinate) a flower later with other insects and their fees. So every half hour throughout the experiments, the team plucked all the flowers in each of the four combinations of fragrance and bees. Hand-pollinated flowers should develop and bees. Hand-pollinated flowers with the maximum number of seeds, "It was very labor intensive," says Thies. "We would be out there at four in the morning, three observations each for two-minute intervals," observes Thies. "We were walking from flower to flower, several hours, for example, for each of the four combinations of fragrance and bees, did not prefer the highly scented flowers, did not prefer the bees more than normal ones. This thinks enhanced flowers and honey bees visited less often, repelled not by the fragrance itself, but by the than normal ones. This is why the bees were repelled not by the fragrance itself, but by the abundance of bees: The data showed that the more bees on a flower, the less likely a honey bee was to visit it.

What they saw was double the normal number of bees ever inhaling we saw," says Thies. "It was very labor intensive," says Thies. "As soon as they did, the team spent the next 60 in the morning, to try and set up before these flowers open." As soon as they did, the team spent the next 65 down ever inhaling each for two-minute intervals "and writing several hours walking from flower to flower, several hours, for example, for each of the four combinations of fragrance and bees, did not prefer the highly scented flowers, did not prefer the bees more than normal ones. This thinks enhanced flowers and honey bees visited less often, repelled not by the fragrance itself, but by the abundance of bees: The data showed that the more bees on a flower, the less likely a honey bee was to visit it.

That added up to less reproduction for fragrance-enhanced flowers. Gourds that developed regardless of whether they also repelled weight, a hard-to-interpret result that suggests that lost bee visits did somehow harm fruit development.)

40 the plants got swabs without fragrance. The plants more fragrance than a normal one; the other half of flowers. Each treated flower emitted about 45 times dimethoxybenzene-treated swabs deep inside their the plants more fragrant by touching 35 throughout the August flowering season, made half the flowers round vines in an Iowa field and, 168 Texas found out, too. To find out, she and Adler planned bees—, too—and extra scent could well call in more Massachusetts. But, she adds, that idea hasn't really been tested—, and even more appealing to bees, "We have this 30 ecologist at Illinois College in Chicago, attract a lot of pollinators," says Thies, a chemical assumption that a really fragrant flower is going to even more appealing to bees. "We have this intuition suggests that more of that aroma should 25 into traps—is 1,4-dimethoxybenzene. abundant—and the only one that lures squash bees includes 10 compounds, but the most includes too many bees. The Texas gourd vines main pollinators are honey bees and specialized squash pollinators, to their surprise, did not prefer the highly scented flowers, did not prefer the bees more than normal ones. This thinks enhanced flowers and honey bees were indifferent. 20 too many bees. The Texas gourd vines but not gourd—how to attract enough pollinators but not took on the specific problem of the Texas In one recent study, Nina Thies and Lynn Adler mere days, reduced bacterial wilt disease, an infection that can 15 reduce an entire plant to a heap of collapsed tissue among the very bad guys. They chew up pollen and petals, defecate in the flowers and transmit the a Texas gourd plant, striped cucumber beetles are 10 the good guys, but you also attract the bad guys. For chemical ecology in Germany. You attract not just ecologists Jan Baldwin of the Max Planck Institute for open communication network," says chemical 5 pollen from flower to flower. But, "when you 10 aroma attract bees that gather nectar and shuttle close at noon, their yellow petals and mild, squashy blossoms in the dim hours before sunrise. Until they 15 Texas gourd vines until their large, larval 20 Research Society. This passage is adapted from Elsa Youngsteadt, "Decoding a flower's message," ©2012 by Sigma Xi, The Scientific Questions 22–32 are based on the following passage.

CONTINUE

- Which statement about striped cucumber beetles can most reasonably be inferred from the passage?
- They feed primarily on Texas gourd plants.
  - They are less attracted to dimethoxybenzene than honey bees are.
  - They experience only minor negative effects as a result of carrying bacterial wilt disease.
  - They are attracted to the same compound in Texas gourd scents that squash bees are.
- The author indicates that it seems initially plausible that Texas gourd plants could attract more pollinators if they
- did not have aromatic flowers.
  - targeted insects other than bees.
  - increased their floral scent.
  - emitted more varied fragrant compounds.
- 25

24

- As presented in the passage, This and Adler's research primarily relied on which type of evidence?
- Direct observation
  - Historical data
  - Expert testimony
  - Random sampling
- 23

- The primary purpose of the passage is to
- discuss the assumptions and reasoning behind a theory.
  - describe the aim, method, and results of an experiment.
  - present and analyze conflicting data about a phenomenon.
  - show the innovative nature of a procedure used in a study.
- The author indicates that it seems initially plausible that Texas gourd plants could attract more pollinators if they
- did not have aromatic flowers.
  - targeted insects other than bees.
  - increased their floral scent.
  - emitted more varied fragrant compounds.
- 25

24

- 85 The new results provide a reason that Texas gourd plants never evolved to produce a stronger scent. "If you really ramp up the odor, you don't get more pollinators, but you can really get tipped apart by your enemies," says Rob Raguso, a chemical ecologist at Cornell University who was not involved in the Texas gourd study.
- "The new results provide a reason that Texas gourd plants never evolved to produce a stronger scent. "If you really ramp up the odor, you don't get more pollinators, but you can really get tipped apart by your enemies," says Rob Raguso, a chemical ecologist at Cornell University who was not involved in the Texas gourd study.
- 22

21

(A) summarize Theis and Adler's findings.  
(B) describe Theis and Adler's hypotheses.  
(C) illustrate Theis and Adler's methods.  
(D) explain Theis and Adler's reasoning.

The primary function of the seventh and eighth paragraphs (lines 65-84) is to

A) Lines 45-50 ("So every . . . beetles")  
B) Lines 51-53 ("Finally . . . beetles")  
C) Lines 59-61 ("We would . . . open")  
D) Lines 76-79 ("Gourds . . . flowers")

Which choice provides the best evidence for the answer to the previous question?

What did Theis and Adler do as part of their study that most directly allowed this to reason that "bees were repelled not by the fragrance itself" (lines 70-71)?

A) They observed the behavior of bees and beetles both before and after the flowers opened in the morning.

B) They increased the presence of 1,4-dimethoxybenzene only during the August flowering season.

C) They compared the gourds that developed from naturally pollinated flowers to the gourds that developed from bees a chance to choose between beetle-free flowers and beetle-free enhanced flowers and beetle-free normal flowers.

D) They gave bees a chance to choose between developing from hand-pollinated flowers.

As used in line 38, "treated" most nearly means

- A) altered.
- B) restored.
- C) provided.
- D) preserved.

CONTINUE

- According to the passage, Thies and Adler's research offers an answer to which of the following questions?
- A) How can Texas gourd plants increase the number of visitors they receive from pollinators?  
 B) Why is there an upper limit on the intensity of the aroma emitted by Texas gourd plants?  
 C) Why does hand pollination rescue the fruit weight of beetle-infested Texas gourd plants?  
 D) Why do Texas gourd plants stop producing fragrance attractive to pollinators when beetles are present?
- Which choice provides the best evidence for the answer to the previous question?
- A) Lines 17-20 ("In one . . . beetles")  
 B) Lines 22-25 ("The aroma . . .")  
 C) Lines 79-84 ("Hand . . . development")  
 D) Lines 85-86 ("The new . . . scene")

32

- In prescribing squash bees as "indifferent" (line 68), the author most likely means that they
- A) could not distinguish enhanced flowers from normal flowers.  
 B) visited enhanced flowers and normal flowers at an equal rate.  
 C) largely preferred normal flowers to enhanced flowers.  
 D) were as likely to visit beetle-free enhanced flowers as to visit beetle-free enhanced flowers.
- Which choice provides the best evidence for the answer to the previous question?
- A) Lines 1-10 ("The . . . flowers")  
 B) Lines 11-15 ("The . . . flowers")  
 C) Lines 16-20 ("The . . . flowers")  
 D) Lines 21-25 ("The . . . flowers")

31

- In prescribing squash bees as "indifferent" (line 68), the author most likely means that they
- A) could not distinguish enhanced flowers from normal flowers.  
 B) visited enhanced flowers and normal flowers at an equal rate.  
 C) largely preferred normal flowers to enhanced flowers.  
 D) were as likely to visit beetle-free enhanced flowers as to visit beetle-free enhanced flowers.
- Which choice provides the best evidence for the answer to the previous question?
- A) Lines 1-10 ("The . . . flowers")  
 B) Lines 11-15 ("The . . . flowers")  
 C) Lines 16-20 ("The . . . flowers")  
 D) Lines 21-25 ("The . . . flowers")

30

There is no grievance that is a fit object of redress by mob law. In any case that arises, as for instance, the promulgation of abolitionism, one of two positions is necessarily true; that is, the thing is right or mob law, either necessary, justifiable, or excusable enactments; and in neither case, is the interpretation of all law and all good citizens; or, it is wrong, and therefore proper to be prohibited by legal provision is necessary true; that is, the thing is right or mob law, either necessary, justifiable, or excusable them until we have succeeded, or shall we transfer them at once? Men generally, under such a government as this, think that they ought to wait until they have persuaded the majority to alter them. They think that, if they should resist, the remedy would be worse than the evil. But it is the fault of the government that makes it worse. Why is it not better to anticipate and provide for reform? Why does it not cherish its wise minority? Why does it not 55  
before it is hurt? . . .

If the injustice is part of the necessary friction of the machine of government, let it go, let it go; the machine will wear out. If the injustice has a spring, or a pulley, or a rope, or a crank, exclusively for itself, then perhaps you may consider whether the remedy 60  
will not be worse than the evil; but if it is of such a nature that it requires you to be the agent of injustice to do is to see, at any rate, that I do not lend myself to another, then, I say, break the law. Let your life be a counter friction to stop the machine. What I have to do is to live in it, be it good or bad. A man has ways. They take too much time, and a man's life will be gone. I have other affairs to attend to. I came into this world, not chiefly to make this a good place to live in, but to live in it, be it good or bad. A man has 65  
provided for remedying the evil, I know not of such 70  
As for adopting the ways which the State has the wrong which I condemn.

20  
should do something wrong. . . .

Zaggers

**Passage 1** *Young Men's Lyceum of Springfield, Illinois; "Address to the Young Men's Lyceum of Springfield, Illinois," Originally delivered in 1838. Passage 2 is from Henry David Thoreau, "Resistance to Civil Government," Originally published in 1849.*

Let every American, every lover of liberty, every well-wisher to his posterity, swear by the blood of the Revolution, never to violate in the least particular, the laws of the country; and never to tolerate their violation by others. As the patriots of seventy-six did to the support of the Declaration of Independence, so to the support of the Constitution and Laws, let every American pledge his life, his property, and his sacred honor; —let every man remember that to violate the Constitution is treason; —let every man remember that it is his duty to obey it; —let it be taught in schools, in seminaries, and in colleges,—let it be written in Primers, spelling books, and in Almanacs;—let it be preached from the pulpit, proclaimed in legislative halls, and enforced in courts of justice. And, in short, let it become the political religion of the nation:

When I so pressingly urge a strict observance of all the laws, let me not be understood as saying there are no bad laws, nor that grievances may not arise, for the redress of which, no legal provisions have been made. I mean to say no such thing. But I do mean to say, that although bad laws, if they exist, should be repealed as soon as possible, still while they continue in force, for the sake of example, they should be religiously observed. So also in unprovided cases. If such arise, let proper legal provisions be made for them with the least possible delay; but, till then, let them if not too intolerable, be borne with.

Passage 1 is adapted from Abraham Lincoln, "Address to the Young Men's Lyceum of Springfield, Illinois," Originally delivered in 1838. Passage 2 is from Henry David Thoreau, "Resistance to Civil Government," Originally published in 1849.

Passages 3-42 are based on the following passages.

Questions 33-42 are based on the following passage.

The sentence in lines 24-28 ("When . . . made") primarily serves which function in Passage 1?

- A) It raises and refutes a potential counterargument to Lincoln's argument.
- B) It identifies and concedes a crucial shortcoming of Lincoln's argument.
- C) It acknowledges and substantiates a central assumption of Lincoln's argument.
- D) It anticipates and corrects a possible misinterpretation of Lincoln's argument.

9€

- (A) hasten.
  - (B) stimulate.
  - (C) require.
  - (D) advocate.

As used in line

35

I do not hesitate to say, that those who call themselves Abolitionists should at once effectually As used in line 24, "irre<sup>g</sup>e" most nearly means 35

I do not hesitate to say, that those who call themselves Abolitionists should at once effectually withdraw their support both in person and property, from the government . . . and not wait till they constitute a majority of one, before they suffer the right to prevail through them. I think that it is <sup>85</sup> enough if they have God on their side, without waiting for that other one. Moreover, any man more waiting for that other one. Moreover, any man more right than his neighbors constitutes a majority of one already.

In Passage I, Lincoln condemns that breaking the law has which consequence?

- A) It slows the repeal of bad laws.
- B) It undermines and repudiates the nation's values.
- C) It leads slowly but inexorably to rule by the mob.
- D) It creates divisions between social groups.

Which choice provides the best evidence for the answer to the previous question?

- A) Lines 9-12 ("let every man . . . liberty")
- B) Lines 20-23 ("and let . . . altars")
- C) Lines 33-35 ("If such . . . borne with")
- D) Lines 36-37 ("There . . . law")

۳۴

88

Which choice provides the best evidence for the answer to the previous question?

A) Lines 45-48 ("Unjust . . . once")  
B) Lines 51-52 ("They . . . evil")  
C) Lines 58-59 ("If the injustice . . . go")  
D) Lines 75-78 ("A man . . . wrong")

39

- In Passage 2, Thoreau indicates that some unjust aspects of government are
- A) superficial and can be fixed easily.
  - B) subtle and must be studied carefully.
  - C) self-correcting and may be beneficial.
  - D) inevitable and should be endured.

As used in line 32, "observed" most nearly means

38

- A) followed.
- B) scrutinized.
- C) contemplated.
- D) noticed.

37

- Based on the passages, one commonality in the stances Lincoln and Thoreau take toward abolitionism is that
- both authors see the cause as warranting drastic action.
  - both authors view the cause as central to their argument.
  - neither author expects the cause to win widespread acceptance.
  - neither author embraces the cause as his own.
- Based on the passages, one commonality in the

42

- The primary purpose of each passage is to
- make an argument about the difference between legal duties and moral imperatives.
  - discuss how laws ought to be enacted and change in a democracy.
  - advocate a view regarding whether individuals should follow all of the country's laws.
  - articulate standards by which laws can be evaluated as just or unjust.
- Based on the passages, Lincoln would most likely
- an excusable reaction to an intolerable situation.
  - a rejection of the country's proper forms of remedy.
  - an honorable response to an unjust law.
  - a misapplication of a core principle of the Constitution.

40

- 41
- Lincoln's "If it . . . law" as described in the behavior that Thoreau recommends in lines 64–66 ("if it . . . law") as
- Based on the passages, Lincoln would most likely
- an excusable reaction to an intolerable situation.
  - a rejection of the country's proper forms of remedy.
  - an honorable response to an unjust law.
  - a misapplication of a core principle of the Constitution.

- 41
- evaluate as just or unjust.
- Based on the passages, Lincoln would most likely
- an excusable reaction to an intolerable situation.
  - a rejection of the country's proper forms of remedy.
  - an honorable response to an unjust law.
  - a misapplication of a core principle of the Constitution.

Meanwhile, researchers at the National Renewable Energy Laboratory have made flexible solar cells on a new type of glass from Corning called Willow Glass, which is thin and can be rolled up. The type of solar cell they made is the only current challenger to silicon in terms of large-scale production—thin-film cadmium telluride. Flexible solar cells could lower the cost of installing solar cells, making solar power cheaper.

Jianhua Zhao, cofounder of solar panel manufacturer China Sunergy, announced this week that he is building a pilot manufacturing line for a two-sided solar cell that can absorb light both the front and back. The basic idea, which isn't new, is that during some parts of the day, sunlight falls on the back, and could be harvested to increase the power output. This works particularly well when the solar panels are built on sand, which is highly reflective. Where a one-sided solar panel might generate 340 watts, a two-sided one might generate up to 400 watts. He expects the panels to generate 10 to 20 percent more electricity over the course of a year.

Even longer-term, Green is betting on silicon. 70 aiming to take advantage of the huge reductions in cost already seen with the technology. He hopes to greatly increase the efficiency of silicon solar panels by combining silicon with one or two other semiconductors, each selected to efficiently convert 75 part of the solar spectrum that silicon doesn't convert efficiently. Adding one semiconductor could boost around 40 percent. Adding another could make efficiencies from the 20 to 25 percent range to 80 a given installation. The challenge is to produce good connections between these semiconductors, which would cut in half the number of solar panels needed for a given installation.

Solar panel installations continue to grow quickly, but the solar panel market may be slowing innovation, but the IEEE Photovoltaics Specialists Conference in Tampa, Florida, people in the industry remain optimistic about its long-term prospects.

The technology that's surprised almost everyone is conventional crystalline silicon. A few years ago, New South Wales and one of the leading silicon solar panel researchers, declared that they'd never go below \$1 a watt, "Now it's down to something like 50 cents a watt, and there's talk of hitting 36 cents per watt," he says.

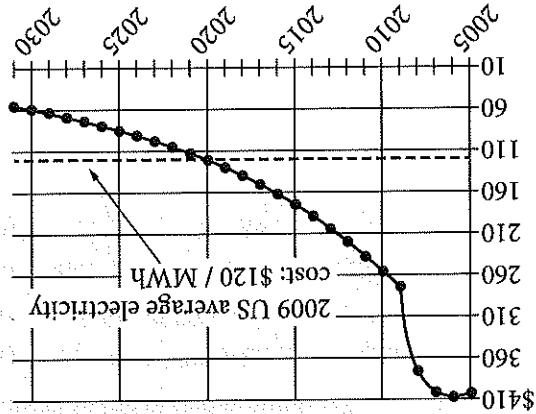

The U.S. Department of Energy has set a goal of reaching less than \$1 a watt—not just for the solar panels, but for complete, installed systems—by 2020. Green thinks the solar industry will hit that target even sooner than that. If so, that would bring the direct cost of solar power to six cents per kilowatt-hour, which is cheaper than the average cost expected for power from new natural gas power plants.

All parts of the silicon solar panel industry have been looking for ways to cut costs and improve the power output of solar panels, and that's led to already mundane as the pastes used to screen-print some of the features on solar panels. Green's lab built a solar cell in the 1990s that set a record efficiency for silicon cells—a record that stands to this day. To achieve that record, he had to use expensive lithography techniques to make fine wires for collecting current from the solar cell. But gradual improvements have made it possible to use screen printing to produce ever-finer lines. Recent research suggests that screen-printing techniques can produce lines as thin as 30 micrometers—about the width of the lines Green used for his record solar cells, but at costs far lower than his lithography techniques.

Next for the solar industry? ©2013 by MIT Technology Review. This passage is adapted from Kevin Bullis, "What Tech Is Next for the Solar Industry?" ©2013 by MIT Technology Review.

Which choice provides the best evidence for the answer to the previous question?

- A) Lines 58-61 ("The basic ... plant")
- B) Lines 61-62 ("That ... output")
- C) Lines 63-64 ("This ... reflective")
- D) Lines 64-66 ("Where ... 400 watts")

Which choice provides the best evidence for the answer to the previous question?

- A) requiring little energy to operate.
- B) absorbing reflected light.
- C) being reasonably inexpensive to manufacture.
- D) preventing light from reaching the ground.

According to the passage, two-sided solar panels will likely raise efficiency by

- A) Lines 1-3 ("Solar ... demand")
- B) Lines 10-15 ("A few ... a watt")
- C) Lines 22-26 ("If so ... plants")
- D) Lines 27-30 ("All ... reductions")

Which choice provides the best evidence for the answer to the previous question?

The passage is written from the point of view of a

D) Willow Glass is too inefficient to be marketable.

C) the cost of solar panels is too high and their power output too low.

B) two-sided cells have weaknesses that have not yet been discovered.

A) consumers don't understand how solar panels work.

It can most reasonably be inferred from the passage that many people in the solar panel industry believe that

- A) weak.
- B) humble.
- C) pitiable.
- D) obsolete.

As used in line 4, "poor" most nearly means

D) hobbyist explaining the capabilities of new technology.

C) journalist enumerating changes in a field.

B) scientist comparing competing research methods.

A) consumer evaluating a variety of options.

2

12

Which choice most effectively combines the underlined sentence?

- A) In addition to being unsightly and odorous, these algal blooms cause oxygen depletion; the result being that it kills fish and other wildlife in the lakes.
- B) In addition to being unsightly and odorous, these algal blooms cause oxygen depletion, the algal blooms cause oxygen depletion that kills fish and other wildlife in the lakes.
- C) In addition to being unsightly and odorous, these algal blooms cause oxygen depletion caused by the algal blooms that kill fish and other wildlife in the lakes.
- D) In addition to being unsightly and odorous, these algal blooms cause oxygen depletion caused by the algal blooms that kill fish and other wildlife in the lakes.

3

Which choice most effectively combines the underlined sentence?

- Oxygen depletion kills fish and other wildlife in the lakes.
- Oxygen depletion causes oxygen depletion.
- In addition to being unsightly and odorous, these algal blooms cause oxygen depletion.
- In addition to being unsightly and odorous, these algal blooms cause oxygen depletion that kills fish and other wildlife in the lakes.
- In just weeks after the scientists added the nutrients and phosphates, the water in Lake 227 turned bright blue-green. It was thick with the same type of algal blooms that had plagued Lake Erie.
- In addition to being unsightly and odorous, these algal blooms cause oxygen depletion.
- Schmidler and Brunskull were investigating possible causes for the large blooms of blue-green algae, or cyanobacteria, that had been affecting bodies of water such as Lake Erie. In addition to being unsightly and odorous, these algal blooms cause oxygen depletion.

A) NO CHANGE

- D) green, it was thick with—
- C) green. It was thick with—
- B) green; it was thick with
- D) green, it was thick with

4

A) NO CHANGE

- D) In addition to being unsightly and odorous, these algal blooms cause oxygen depletion caused by the algal blooms that kill fish and other wildlife in the lakes.
- C) In addition to being unsightly and odorous, these algal blooms cause oxygen depletion caused by the algal blooms that kill fish and other wildlife in the lakes.
- B) In addition to being unsightly and odorous, these algal blooms cause oxygen depletion caused by the algal blooms that kill fish and other wildlife in the lakes.
- D) In addition to being unsightly and odorous, these algal blooms cause oxygen depletion caused by the algal blooms that kill fish and other wildlife in the lakes.

2

2

Which choice provides the best transition from the previous paragraph to this one?

A) NO CHANGE

B) The Experimental Lakes Area is located in a sparsely inhabited region that experiences few effects of human and industrial activity.

C) To isolate the cause of the algae, Schindler and Bruns skill performed another experiment; this time using Lake 226.

D) The process by which water becomes enriched by dissolved nutrients, such as phosphates, is called eutrophication.

to conduct research that helps people better understand threats to the environment. The scientists divided the lake in half by placing a nylon barrier through the narrowest part of its figure-eight shape. In one half of Lake 226, they added phosphates, nitrates, and a source of carbon; in the other, they added just nitrates. 6 and a source of carbon was added. Schmidler and Brunsell hypothesized that phosphates were responsible for the growth of cyanobacteria. The experiment confirmed their hypothesis.

- (A) NO CHANGE
- (B) and a source of carbon.
- (C) Plus also a source of carbon.
- (D) but also adding a source of carbon.

Lake 226, they added phosphates, nitrates, and a source of carbon; in the other, they added just nitrates [6] and a source of carbon was added. Schmidler and Brunsell hypothesized that phosphates were responsible for the growth of cyanobacteria. The experiment confirmed their suspicions when the half of the lake containing the phosphates [7] was teeming with blue-green algae.

(A) NO CHANGE  
(B) were teeming  
(C) are teeming  
(D) tems

6

(A) NO CHANGE  
(B) and a source of carbon.  
(C) plus also a source of carbon.  
(D) but also adding a source of carbon.

9

A) NO CHANGE

B) The Experimental Lakes Area is located in a sparsely inhabited region that experiences few effects of human and industrial activity.

C) To isolate the cause of the algae, Schindler and Bruns skill performed another experiment, this time using Lake 226.

D) The process by which water becomes enriched by dissolved nutrients, such as phosphates, is called eutrophication.

to conduct research that helps people better understand threats to the environment. The scientists divided the lake in half by placing a nylon barrier through the narrowest part of its figure-eight shape. In one half of Lake 226, they added phosphates, nitrates, and a source of carbon in the other, they added just nitrates and a source of carbon was added. Schmidler and Brunsell hypothesized that phosphates were responsible for the growth of cyanobacteria. The experiment confirmed their suspicions when the half of the lake containing the phosphates was teeming with blue-green algae.

- At this point, the writer wants to add a second policy outcome of the research described. Which choice best accomplishes this goal?
- 10
- A) Lake 226 continued to develop blooms of blue-green algae for eight consecutive years after the experiment took place.
- B) In the United States, many individual states have also adopted legislation to eliminate, or at least reduce, phosphorous content in laundry detergents.
- C) In 1974, Schindler initiated a study of the effects of acid rain, using Lake 223 to examine how sulfuric acid altered aquatic ecosystems.
- D) Aerial photos of the lakes taken before and during algal blooms helped convey the effects of phosphates in water to the public.

- 8
- Schindler and Brunsell's findings were shown off by the journal *Science*. The research demonstrated a clear correlation between introducing phosphates and the growth of blue-green algae. **9** For example, legislators in Canada passed laws banning phosphates in laundry detergents, which had been entering the water supply.
- 9
- A) NO CHANGE
- B) put in the spotlight of
- C) published in

Schindler and Brunsell's findings were **8** shown off by the journal *Science*. The research demonstrated a clear correlation between introducing phosphates and the growth of blue-green algae. **9** For example, legislators in Canada passed laws banning phosphates in laundry detergents, which had been entering the water supply. **10**

- Which choice most effectively anticipates and addresses a relevant counterargument to the argument in favor of the types of experiments described in the passage?
- A) NO CHANGE
- B) Many companies now offer phosphate-free alternatives for household cleaning products.
- C) Obviously, scientists should not be allowed to randomly perform experiments on just any body of water.
- D) Phosphates are sometimes used in agricultural fertilizers, in addition to being used in cleaning products.

Experiments like these can help people understand the unintended consequences of using certain household products. **II** Of course, regulating the use of certain chemical compounds can be a controversial issue. Selectively establishing remote locations, such as the Experimental Lakes Area, can provide scientists with opportunities to safely conduct controlled research. This research can generate evidence solid enough to persuade policy makers to take action in favor of protecting the larger environment.

- Which choice best supports the main point of the paragraph?
- A) NO CHANGE
- B) although not everyone on the committee agreed completely about what the committee was doing,
- C) which meant somehow preserving the tower's tilt while preventing that tilt from increasing and
- D) which included the pristine white marble finish that has come to be widely associated with the tower's beauty.

The committee was charged with saving the tower without ruining its aesthetic. **18** which no one had yet managed to achieve. The committee's first attempt to reduce the angle of the tower's tilt—placing 600 tons of iron ingots (molded pieces of metal) on the tower's north side to create a counterweight—was derided because the bulky weights ruined the tower's appearance. The attempt at a less visible solution—smoking anchors into the ground below the tower—almost caused the tower to fall.

- [1] [19] he is a geotechnical engineer from England who saved London's clock tower Big Ben from collapse. [2] [20] he took several years to begin a years-long process of drilling out small amounts of soil from under the tower's foundation and then monitoring the tower's resulting movements and made recommendations as to how much soil should be removed in the next drilling. [4] By 2001, almost 77 tons of soil had been removed, and the tower's tilt had decreased by over 1.5 degrees; the ugly iron north side, opposite its tilt, to enable gravity to straighten removing small amounts of soil from under the tower's visitors. [5] Burland [21] advocated using soil extraction: weights were removed, and the tower was reopened to the public.

(B) Thus,

(C) Despite this,

(D) On the other hand,

might otherwise undertake these tasks. Moreover, the training period for PAs is markedly shorter than those for physicians—two to three years versus three to eleven required for physicians.

30 In many locations, some 90,000 PAs were employed nationwide in 2012. Over and above their value in partially compensating for the general physician shortage has been their extraordinary contribution to rural health care. A recent review of the scholarly literature by Texas researchers found that PAs lend cost-efficiency

31 In addition, rural-based PAs often provide a broader spectrum of such services than do their urban and suburban counterparts, possibly as a consequence of the limited pool of rural-based physicians.

- At this point, the writer is considering adding the following sentence.
- In fact, according to the data presented in the table, physician assistants will likely outnumber physicians by 2025.
- Should the writer make this addition here?
- A) Yes, because it provides additional support for the main point of the paragraph.
- B) Yes, because it addresses a possible counterargument to the writer's main claim.
- C) No, because it is not an accurate interpretation of the data.
- D) No, because it introduces irrelevant information that interrupts the flow of the passage.
- 33**
- A) NO CHANGE
- B) patience, than
- C) patients then
- D) patients than

Provider type	Number	Percent of total	Number of total	Percent of total	2010	2025 (predicted)
Physicians	210,000	71	216,000	60		
Physician assistants	30,000	10	42,000	12		
Nurse-practitioners	56,000	19	103,000	28		
Total	296,000	100	361,000	100		

Adapted from David L. Auerbach et al., "Nurse-Manned Health Centres and Patient-Centred Medical Homes Could Mitigate Expectant Primary Care Physician Shortage," ©2013 by Project HOPE: The People-to-People Health Foundation, Inc.

Increasingly, PAs and other such medical practitioners have become a critical complement to physician assistants. A 2013 RAND Corporation report estimates that while the number of primary care physicians will increase slowly from 2010 to 2025, the number of physician assistants and nurse-practitioners in primary care will grow at much faster rates. Both by merit and from necessity, PAs are likely to greet more **E3** patients than ever before.

Supply of Physicians, Physician Assistants, and Nurse-Practitioners in Primary Care and Nurse-Practitioners in Primary Care Clinical Practice in 2010 and 2025

contemporary readers. Superhero comic books are much like popular film franchises in being often "rebooted" in an effort to make their characters and stories fresh and relevant for new audiences. Superhero comic books are periodically reworked to try to increase their appeal to contemporary readers, while popular film franchises are often "rebooted" in an effort to make them fresh and relevant for new audiences. Superhero comic books are periodically reworked to try to increase their appeal to contemporary readers. Superhero comic books are similar to superhero comic books, which are film franchises, which are often "rebooted," are fresh and relevant for new audiences. In an effort to make their characters and stories underlined sentences? Which choice most effectively combines the underlined sentences?

34

**34** Popular film franchises are often "rebooted" in an effort to make their characters and stories fresh and relevant for new audiences. Superhero comic books are periodically reworked to try to increase their appeal to contemporary readers. This practice is almost as the medium itself and has in large part established the "ages" that comprise comic book history. The shift from the Golden to the Silver Age is probably the most successful **36** example: of publishers responding to changing times and tastes.

**35** elderly as the medium itself and has in large part established the "ages" that comprise comic book history. In an effort to make their characters and stories fresh and relevant for new audiences, Superhero comic books are periodically reworked to try to increase their appeal to contemporary readers. This practice is almost as the medium itself and has in large part established the "ages" that comprise comic book history. The shift from the Golden to the Silver Age is probably the most successful **36** example: of publishers responding to changing times and tastes.

2

Which choice is most consistent with the previous examples in the sentence?

- (B) held down a regular job as a newspaper reporter.  
(C) wear a bright blue costume with a flowing  
red cape.  
(D) live in the big city of Metropolis instead of the  
small town where he grew up.

Which choice is most consistent with the previous examples in the sentence?

The start of the first ("Golden") age of comic books is often dated to 1938 with the debut of Superman in Action Comics #1. Besides beginning the age, Superman in many respects defined it, becoming the model on which many later superheroes were based. His characterization, as established in Superman #1 (1939), was relatively simple. He could "hurdle skyscrapers" and "leap an eighth of a mile"; "run faster than a streamline train"; withstand anything less than a "bursting shell"; and [37] lift a car over his head. Sent to Earth from the "doomed planet" Krypton, he was raised by human foster parents, whose "benefit mankind." Admirable but aloof, the Golden Age problem only partially solved by giving him a human alter ego. Other Golden Age superheroes were similarly archetypal: Batman was a crime-fighting millionaire, Wonder Woman a warrior princess from a mythic island.

A) NO CHANGE

B) the distinctive stages of comic book history are less well defined than the one between the Golden and Silver Ages.

C) readers increasingly gravitated to the upstarts as the 1960s and the Silver Age drew to a close.

D) these characters themselves underwent significant changes over the course of the Silver Age.

(A) NO CHANGE

(B) reflected the increasing conservatism of the United States in the 1950s.

(C) engaged in bizarre adventures frequently inspired by science fiction.

(D) were more "realistic" than their Golden Age counterparts.

---

(A) NO CHANGE

(B) age;

(C) age,

(D) age.

83

By contrast, the second ("Silver") age of comics was marked by characters that, though somewhat simplistic by today's standards, **38** were provided with original stories often involving scientific experiments gone wrong. In addition to super villains, the new, soon-to-be-iconic characters of the **39** age: Spider-Man, the Fantastic Four, and the Hulk among them—had to cope with mundane, real-life problems, including paying the rent, dealing with family squabbles, and racing anger, loneliness, and ostracism. Their interior lives were richer and their strong for Golden Age stalwarts Superman and, to a lesser extent, Batman, **40** subsequent decades would show the enduring appeal of these characters.

C) were yielding  
D) will yield

More transformations would take place in the medium as the Silver Age gave way to the Bronze and Modern (and possibly Postmodern) Ages. Such efforts complete re-launch of DC [4] Comics' superhero's line in 2011 has failed to arrest the steep two-decade decline of comic book sales. For both commercial and, arguably, creative reasons, [43] then, no transition was more successful than [44] those from the Golden to Silver Age.

- 3) Salim wants to purchase tickets from a vendor to watch a tennis match. The vendor charges one-time service fee for processing the purchase of the tickets. The equation  $T = 15n + 12$  represents the total amount  $T$ , in dollars, Salim will pay for  $n$  tickets. What does 12 represent in the equation?
- A) 17  
B) 17?  
C)  $6 + 11i$   
D)  $8 + 24i$
- 4)  $4 + 8i$ , where  $i = \sqrt{-1}$ ?  
What is the sum of the complex numbers  $2 + 3i$  and

3

3

3

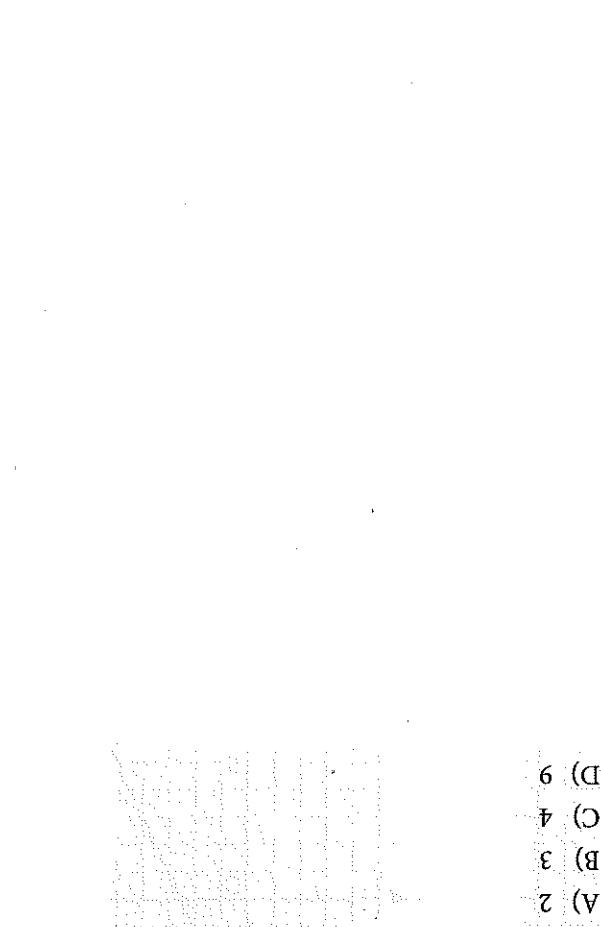

4

- In the equation above,  $p$  and  $t$  are constants.  
Which of the following could be the value of  $p$ ?
- A) 2  
B) 3  
C) 4  
D) 9

A gardener buys two kinds of fertilizer. Fertilizer A contains 60% filler materials by weight and Fertilizer B contains 40% filler materials by weight. Together, the fertilizers bought by the gardener contain a total of 240 pounds of filler materials, which equals the number of pounds of Fertilizer A and  $y$  is the number of pounds of Fertilizer B?

- D)  $60x + 40y = 240$   
C)  $40x + 60y = 240$   
B)  $0.6x + 0.4y = 240$   
A)  $0.4x + 0.6y = 240$

2

- A) The price of one ticket, in dollars  
B) The amount of the service fee, in dollars  
C) The total amount, in dollars, Salim will pay for one ticket  
D) The total amount, in dollars, Salim will pay for any number of tickets
- Salim wants to purchase tickets from a vendor to watch a tennis match. The vendor charges one-time service fee for processing the purchase of the tickets. The equation  $T = 15n + 12$  represents the total amount  $T$ , in dollars, Salim will pay for  $n$  tickets. What does 12 represent in the equation?
- A) 17  
B) 17?  
C)  $6 + 11i$   
D)  $8 + 24i$

1

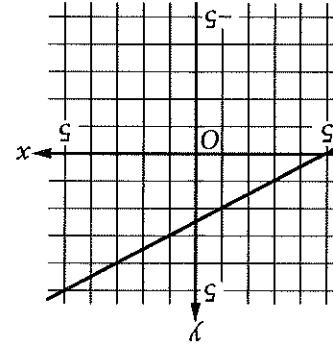

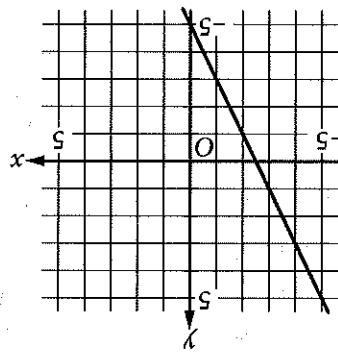

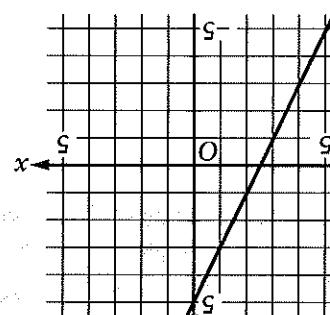

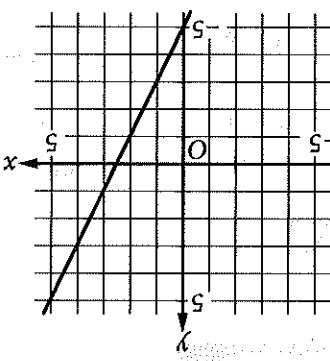

1.  $y = 2x - 5$

A)

B)

C)

D)

Which of the following is the graph of the equation  $y = 2x - 5$  in the  $xy$ -plane?

3

- A)  $\sqrt{5}$   
 B) 5  
 C) 25  
 D) 55

If  $\sqrt{x} + \sqrt{9} = \sqrt{64}$ , what is the value of  $x$ ?

9

- A) 1  
 B) 2  
 C) 3  
 D) 4

The table above shows some values of the functions  $w$  and  $t$ . For which value of  $x$  is  $w(x) + t(x) = x$ ?

$x$	$w(x)$	$t(x)$
5	5	-1
4	3	3
3	4	1
2	3	-1
1	-1	-3

8

If  $x = \frac{3}{2}y$  and  $y = 18$ , what is the value of  $2x - 3$ ?

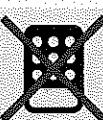

6

- A) 21  
 B) 15  
 C) 12  
 D) 10

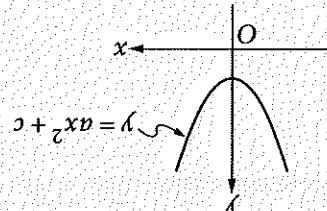

A bricklayer uses the formula  $n = 7\ell h$  to estimate the number of bricks,  $n$ , needed to build a wall that is  $\ell$  feet long and  $h$  feet high. Which of the following correctly expresses  $\ell$  in terms of  $n$  and  $h$ ?

- A)  $\ell = \frac{nh}{7}$   
 B)  $\ell = \frac{h}{7n}$   
 C)  $\ell = \frac{7h}{n}$   
 D)  $\ell = \frac{7+n}{h}$

7

10. Jamie is preparing for a bicycle race. His goal is to bicycle an average of at least 280 miles per week for 4 weeks. He bicycled 240 miles the first week, 310 miles the second week, and 320 miles the third week. Which of the following is equivalent to  $\frac{4x^2 + 6x}{4x + 2}$ ?
- A)  $x$   
 B)  $x + 4$   
 C)  $x - \frac{4x + 2}{2}$   
 D)  $x + 1 - \frac{4x + 2}{2}$
11. Jamie could ride his bicycle 280 miles in 4 hours. If he continues at the same rate, how many hours will it take him to ride 320 miles?
- A) 3  
 B) 4  
 C) 1  
 D) 3
12. Jamie is preparing for a bicycle race. His goal is to bicycle an average of at least 280 miles per week for 4 weeks. He bicycled 240 miles the first week, 310 miles the second week, and 320 miles the third week. Which of the following is equivalent to  $\frac{4x^2 + 6x}{4x + 2}$ ?
- A)  $\frac{240 + 310 + 320}{3} + x \geq 280$   
 B)  $240 + 310 + 320 \geq x(280)$   
 C)  $\frac{4}{240 + 310 + 320} + x \geq 280$   
 D)  $240 + 310 + 320 + x \geq 4(280)$
13. In the equation above,  $t$  is a constant. If the equation has no real solutions, which of the following could be the value of  $t$ ?
- A)  $-3$   
 B)  $-1$   
 C)  $1$   
 D)  $3$
14. The vertex of the parabola in the  $xy$ -plane above is  $(b, c)$  and the graph opens upward. Which of the following is true about the parabola with the equation  $y = -a(x - b)^2 + c$ ?
- A) The vertex is  $(b, c)$  and the graph opens upward.  
 B) The vertex is  $(b, c)$  and the graph opens downward.  
 C) The vertex is  $(-b, c)$  and the graph opens downward.  
 D) The vertex is  $(-b, c)$  and the graph opens upward.

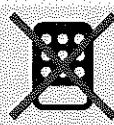

11

The members of a city council wanted to assess the opinions of all city residents about converting an open field into a dog park. The council surveyed a sample of 500 city residents who own dogs. The survey showed that the majority of those surveyed were in favor of the dog park. Which of the following is true about the city council's survey?

A) It shows that the majority of city residents are in favor of the dog park.  
 B) The survey sample should have included more residents who are dog owners.  
 C) The survey sample should have consisted entirely of residents who do not own dogs.  
 D) The survey sample is biased because it is not representative of all city residents.

The table above shows a summary of 1,200 responses to a survey question. Based on the table, how many of those surveyed get most of their medical information from either a doctor or the Internet?

- A) 865  
 B) 887  
 C) 912  
 D) 926

Source	Percent of those surveyed	Percent of those above
Doctor	63%	7%
Internet	13%	2%
Magazines/brochures	9%	6%
Pharmacy	6%	2%
Television

Between 1497 and 1500, Amerigo Vespucci embarked on two voyages to the New World. According to Vespucci's letters, the first voyage lasted 43 days longer than the second voyage. The two voyages combined lasted a total of 1,003 days. How many days did the second voyage last?

For the solution  $(x, y)$  to the system of equations above, what is the value of  $x - y$ ?

$$\begin{aligned} 6x - 3y &= 5 \\ 7x + 3y &= 8 \end{aligned}$$

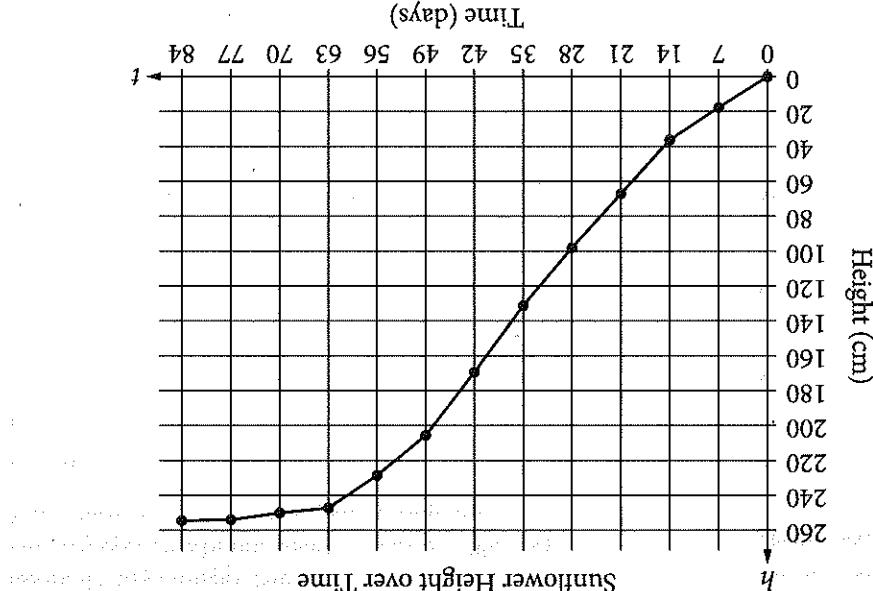

- A)  $-\frac{4}{3}$   
 B)  $\frac{2}{3}$   
 C)  $\frac{4}{3}$   
 D)  $\frac{22}{3}$

- The function  $h$ , defined by  $h(t) = at + b$ , where  $a$  and  $b$  are constants, models the height, in centimetres, of the sunflower after  $t$  days of growth during a time period in which the growth is approximately linear. What does  $a$  represent?
- A) The predicted number of centimetres the sunflower grows each day during the period  
 B) The predicted height, in centimetres, of the sunflower at the beginning of the period  
 C) The predicted total increase in the height of the sunflower at the end of the period  
 D) The predicted total increase in centimetres, during the period
- Over which of the following time periods is the average growth rate of the sunflower least?
- A) Day 0 to Day 21  
 B) Day 21 to Day 42  
 C) Day 42 to Day 63  
 D) Day 63 to Day 84

13

In 1919, H. S. Reed and R. H. Holland published a paper on the growth of sunflowers. Included in the paper were the table and graph above, which show the height  $h$ , in centimetres, of a sunflower  $t$  days after the sunflower begins to grow.

Approximate the growth rate of a sunflower  $t$  days after the sunflower begins to grow.

Day	Height (cm)
0	0.00
7	17.93
14	36.36
21	67.76
28	98.10
35	131.00
42	169.50
49	205.50
56	228.30
63	247.10
70	250.50
77	253.80
84	254.50

Questions 12–14 refer to the following information.

12

4

D)  $y = \frac{2}{7}x - \frac{4}{3}$

C)  $y = \frac{4}{3}x + 2$

B)  $y = 2 \cdot \left(\frac{4}{3}\right)^x$

A)  $y = \frac{1}{2} \cdot \left(\frac{5}{2}\right)^x$

Which of the following equations relates  $y$  to  $x$  for the values in the table above?

$x$	1	2	3	4	$\frac{53}{4}$	$\frac{67}{4}$
$y$	11	25	4	4	5	5

15

D)  $h = 13.2t - 18$

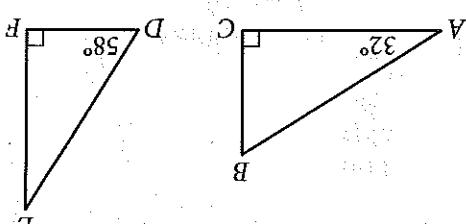

C)  $h = 6.8t - 12$

B)  $h = 4.5t - 27$

A)  $h = 2.1t - 15$

The growth rate of the sunflower from day 14 to day 35 is nearly constant. On this interval, which of the following equations best models the height  $h$ , in centimeters, of the sunflower  $t$  days after it begins to grow?

16

Triangles ABC and DFE are shown above. Which

of the following is equal to the ratio  $\frac{AB}{BC}$ ?

D)  $\frac{DE}{EF}$

C)  $\frac{DF}{EF}$

B)  $\frac{DF}{DE}$

A)  $\frac{DE}{DF}$

14

4

4

19. Some building codes require that, for indoor stairways, the tread depth must be at least 9 inches and the riser height must be at least 5 inches. According to the riser-tread formula, which of the following inequalities represents the set of all possible values for the riser height that meets this code requirement?
- A)  $0 \leq h \leq 5$   
 B)  $h \geq 5$   
 C)  $5 \leq h \leq 8$   
 D)  $8 \leq h \leq 16$
- An architect wants to use the riser-tread formula to design a stairway with a total rise of 9 feet, a riser height between 7 and 8 inches, and an odd number of steps. With the architect's constraints, which of the following must be the tread depth, in inches, of the stairway? (1 foot = 12 inches)
- A) 7.2  
 B) 9.5  
 C) 10.6  
 D) 15

19

20. Some building codes require that, for indoor stairways, the tread depth must be at least 9 inches and the riser height must be at least 5 inches. According to the riser-tread formula, which of the following inequalities represents the set of all possible values for the riser height that meets this code requirement?
- A)  $0 \leq h \leq 5$   
 B)  $h \geq 5$   
 C)  $5 \leq h \leq 8$   
 D)  $8 \leq h \leq 16$

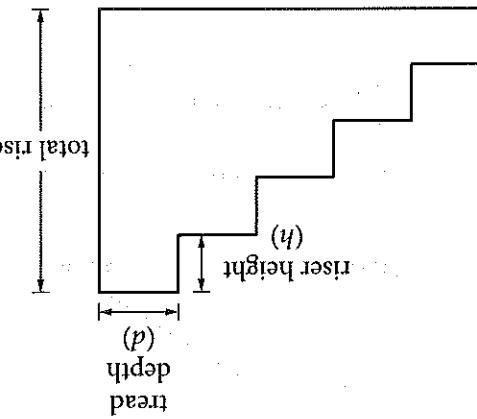

20

17. Which of the following expresses the riser height in terms of the tread depth?
- A)  $h = \frac{2}{1}(25 + d)$   
 B)  $h = \frac{2}{1}(25 - d)$   
 C)  $h = -\frac{2}{1}(25 + d)$   
 D)  $h = -\frac{2}{1}(25 - d)$

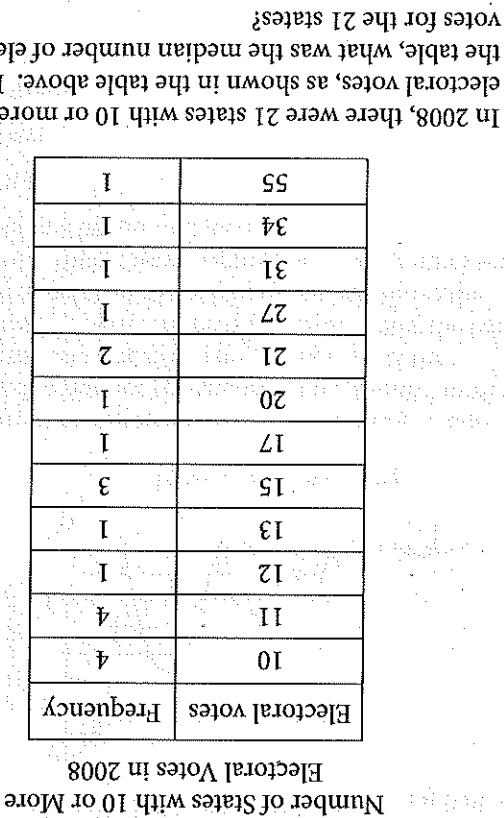

17

When designing a stairway, an architect can use the riser-tread formula  $2h + d = 25$ , where  $h$  is the riser height, in inches, and  $d$  is the tread depth, in inches. For any given stairway, the riser heights are the same and the tread depths are the same for all steps in that stairway. The number of steps in a stairway is the number of its risers. For example, there are 5 steps in the stairway in the figure above. The total rise of a stairway is the sum of the riser heights as shown in the figure.

Note: Figure not drawn to scale.

Questions 17-19 refer to the following information.

Electoral Votes in 2008

Number of States with 10 or More

22

20

What is the sum of the solutions to  $(x - 6)(x + 0.7) = 0$ ?

- A) -6.7  
B) -5.3  
C) 5.3  
D) 6.7

 $(x - 6)(x + 0.7) = 0 \Rightarrow x = 6 \text{ or } x = -0.7$ The sum of the solutions is  $6 + (-0.7) = 5.3$ .

- A) The majority of all fish in the pond weigh less than 2 pounds.  
 B) The average weight of all fish in the pond is approximately 2 pounds.  
 C) Approximately 30% of all largemouth bass in the pond weigh more than 2 pounds.  
 D) Approximately 30% of all largemouth bass in the pond weigh more than 2 pounds.

Pond weight more than 2 pounds.  
 D) Approximately 30% of all largemouth bass in the pond weigh more than 2 pounds.

21

A study was done on the weights of different types of fish in a pond. A random sample of fish were caught and marked in order to ensure that none were weighed more than 2 pounds. Which of the following conclusions is best supported by the sample data?

A study was done on the weights of different types of fish in a pond. A random sample of fish were caught and marked in order to ensure that none were weighed more than 2 pounds. Which of the following conclusions is best supported by the sample data?

- D) 9  
C) 8  
B) 7  
A) 6

Some values of the linear function  $f$  are shown in the table above. What is the value of  $f(3)$ ?

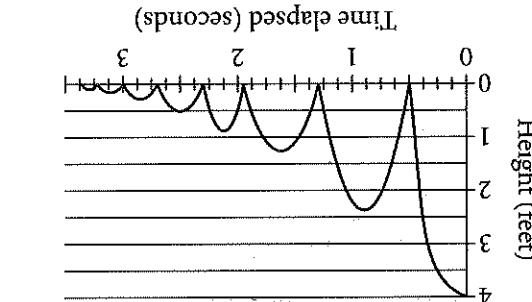

$x$	$f(x)$
6	16
2	4
0	-2
$f(x)$	

25

A customer's monthly water bill was \$75.74. Due to a rate increase, her monthly bill is now \$79.86. To the nearest tenth of a percent, by what percent did the amount of the customer's water bill increase?

- D) 5.4%  
C) 5.2%  
B) 5.1%  
A) 4.1%

As part of an experiment, a ball was dropped and allowed to bounce repeatedly off the ground until it came to rest. The graph above represents the relationship between the time elapsed after the ball was dropped and the height of the ball above the ground. After it was dropped, how many times was the ball at a height of 2 feet?

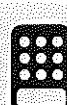

Height versus Time for a Bouncing Ball

- Two different points on a number line are both 3 units from the point with coordinate  $-4$ . The solution to which of the following equations gives the coordinates of both points?
- A)  $|x + 4| = 3$   
 B)  $|x - 4| = 3$   
 C)  $|x + 3| = 4$   
 D)  $|x - 3| = 4$

28

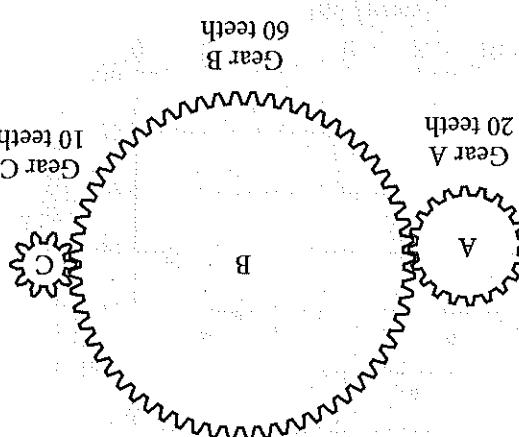

In the  $xy$ -plane, the graph of  $2x^2 - 6x + 2y^2 + 2y = 45$  is a circle. What is the radius of the circle?

- A) 5  
 B) 6.5  
 C)  $\sqrt{40}$   
 D)  $\sqrt{50}$

27

A gear ratio  $r/s$  is the ratio of the number of teeth of two connected gears. The ratio of the number of revolutions per minute (rpm) of two gears is  $s/r$ . In the diagram below, Gear A is turned by a motor. The turning of Gear A causes Gears B and C to turn as well.

Gear A has 20 teeth. Gear B has 60 teeth. Gear C has 10 teeth. If Gear A is rotated at a rate of 100 rpm, what is the number of revolutions per minute for Gear C?

26

If the following equation is solved for  $y$ , then the value of  $y$  is

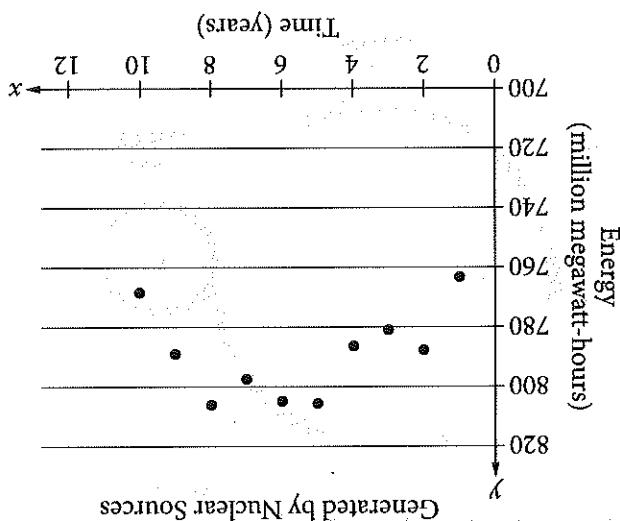

4

4

- D)  $y = -1.674x^2 + 19.76x + 745.73$   
 C)  $y = 1.674x^2 + 19.76x + 745.73$   
 B)  $y = -1.674x^2 - 19.76x - 745.73$   
 A)  $y = 1.674x^2 + 19.76x - 745.73$

Of the following equations, which best models the data in the scatterplot?

The scatterplot below shows the amount of electric energy generated, in millions of megawatt-hours, by nuclear sources over a 10-year period.

30

29

- D)  $16t$   
 C)  $\frac{16}{\sqrt{t}}$   
 B)  $16\sqrt{t}$   
 A)  $4\sqrt{t}$

A motor powers a model car so that after it starts, from rest, the car travels  $s$  inches in  $t$  seconds, where  $s = 16t\sqrt{t}$ . Which of the following gives the average speed of the car, in inches per second, over the first  $t$  seconds after it starts?

A motor powers a model car so that after it starts,

from rest, the car travels  $s$  inches in  $t$  seconds,

where  $s = 16t\sqrt{t}$ . Which of the following gives the average speed of the car, in inches per second, over the first  $t$  seconds after it starts?

**NOTE:** You may start your answers in any column, space permitting. Columns you don't need to use should be left blank.

Answer: 201 – either position is correct

Acceptable ways to grid  $\frac{2}{3}$  are:

Answer:  $\frac{1}{12}$

5. Mixed numbers such as  $3\frac{1}{2}$  must be gridded

correct answer. In such cases, grid only one

3. No question has a negative answer.

2. Mark no more than one circle in any column

circles are filled in correctly.

of the columns to help you fill in the circles accurately. You will receive credit only if the

You write Your answer in the boxes at the top.

1. Although not required, it is suggested that

בכowa'ו חנוך ריב שושען שרען

enter your answer in the grid, as described below or the answer sheet.

For questions 31-38, solve the problem and

At a certain time, there were 15 people in a group. They decided to go on a trip. The cost of the trip was \$800. They decided to divide the cost equally among themselves. When two friends decided not to go on the trip, those remaining still divided the \$800 cost equally, but each friend's share of the cost increased by \$20. How many friends were in the group originally?

What value of  $x$  satisfies the equation above?

$$2(5x - 20) - (15 + 8x) = 7$$

32

A group of friends decided to divide the \$800 cost of a trip equally among themselves. When two of the friends decided not to go on the trip, those remaining still divided the \$800 cost equally, but each friend's share of the cost increased by \$20. How many friends were in the group originally?

of  $x$ ?

The mean of the masses of the rocks Andrew collected is 0.1 kilogram greater than the mean of the masses of the rocks Andrew collected. What is the value of the mean of the masses of the rocks Maria collected? Andrew and Maria each collected six rocks, and the masses of the rocks are shown in the table above.

	Masses (kilograms)					
Maria	x	3.1	2.7	2.9	3.3	2.8
Andrew	2.4	2.5	3.6	3.1	2.5	2.7

36

x-intercept of the line?

The line with the equation  $\frac{4}{5}x + \frac{3}{y} = 1$  is graphed in the  $xy$ -plane. What is the  $x$ -coordinate of the

A school district is forming a committee to discuss plans for the construction of a new high school. Of those invited to join the committee, 15% are parents of students, 45% are teachers from the current high school, 25% are school and district administrators, and the remaining 6 individuals are students. How many more teachers were invited to join the committee than school and district administrators?

Jeremy deposited  $x$  dollars in his investment account on January 1, 2001. The amount of money in the account doubled each year until January 1, 2005. What is the value of  $x$ ? Jeremy had 480 dollars in his investment account on

**DO NOT OPEN THIS BOOK UNTIL THE SUPERVISOR TELLS YOU TO DO SO.**

Published material, do not necessarily represent the opinions of the College Board.  
Ideas contained in passages for this test, some of which are excerpted or adapted from

not sure of the correct answer.

- You do not lose points for wrong answers; therefore,
- For each correct answer, you receive one point.

**SCORING**

- You may not fold or remove pages or portions of a page from this book, or take the book or answer sheet from the testing room.
- You may not use the test book to your answer sheet or fill in circles.
- After time has been called, you may not transfer answers from your test book to your scratch work, but you will not receive credit for anything that you write in your test book.

**USING YOUR TEST BOOK**

- Use only the answer spaces that correspond to the questions.
- Use scored as intended answers. Incomplete erasures may be scored as complete, incomplete erasures may if you erase, do so completely. Incomplete erasures may do not make any stray marks on your answer sheet.
- Make sure you fill the entire circle darkly and completely.
- Carefully mark only one answer for each question.
- You must use a No. 2 pencil.

**INCOMPLETE MARKS**      **EXAMPLES OF**

- Be sure to mark your answer sheet properly.

**MARKING ANSWERS**

- If you finish a section before time is called, check your work on that section. You may NOT turn to any other section.
- You may work on only one section at a time.
- If you finish a section before time is called, check your work on that section. You may NOT turn to any other section.

**IMPORTANT**

The codes below are unique to your test book.  
Copy them on your answer sheet in boxes 8 and 9 and fill in the corresponding circles exactly as shown.
